EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Science; GPA: 4.0/4.0

Atlanta, GA

Aug. 2023 – May 2026

University of Wisconsin-Madison

Bachelor of Science in Computer Science; GPA: 4.0/4.0

Madison, WI

Aug. 2022 – May 2023

Relevant Courses: Data Structures and Algorithms, Computer Organization, Database Systems, Machine Learning and Deep Learning, Operating Systems, Computer Networks

EXPERIENCE

Software Engineering Intern

Shanghai 7Road

May 2025 – Aug. 2025

Shanghai, China

- Actively developed and maintained a microservices-based SDK ecosystem using Spring Boot and Maven multi-module architecture, supporting core business functions including User Management, Payment, and Scheduling.
- Independently designed and implemented critical endpoints for user profile maintenance and extended logging schemas to capture 15+ additional metadata fields while reducing legacy fields, enhancing system traceability.
- Engineered an automated order reissue and status synchronization logic, reducing manual intervention for failed transactions by 80%.
- Seamlessly integrated an third-party payment gateway and boosting checkout success rates.

PROJECTS

Lox Interpreter | C++, Compiler Design, Virtual Machine

Sep 2024 - Aug 2025

- A minimalistic programming language inspired by the Lua and Python. Supports static typing, garbage collection, object-oriented, first-class functions, error handling, modules, REPL, and more. Implemented in C++ with a custom bytecode VM.
- Implemented a minimal standard library and achieved performance comparable to Python 3.7 in many benchmarks

Flashcard Mobile App | React Native, Expo, SQLite

Dec. 2025 - Jan. 2026

- Developed a personal mobile application that generates flashcards from Excel files. Users can upload spreadsheets and dynamically create flashcard dynamically from selected columns
- Integrated local SQLite database to save unfamiliar items for future review, enabling personalized spaced practice

BuzzLink | React, Node.js, WebRTC

Aug. 2024 – Dec. 2024

- Led and contributed to the development of an online video conferencing application as member of GT WebDev
- Developed a full-stack video conferencing platform from the ground up, leveraging WebRTC for low-latency peer-to-peer communication. Built the responsive frontend with React and managed signaling and session handling via a Node.js backend.

Web Chatroom Application | React, Node.js, MySQL, Firebase

Jul. 2024 - Aug. 2024

- Developed a web chatroom application allowing users to join and create different channels
- Implemented public and private messaging functionality with user profile and image storage in MySQL and Firebase

Note-Taking Shell Script | Bash, CLI Tools

Dec. 2023

- Wrote a note-taking shell script which integrates with the popular CLI program tldr
- Offered a powerful tool to access, maintain, and update personal notes efficiently on all kinds of commands

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript, SQL, Go, Lua, Bash

Backend: Spring Boot, Node.js, Express, REST APIs

Web & Frameworks: React, React Native

Database: MySQL, MongoDB, Redis

Developer Tools: Git, Docker, Make, CMake, VS Code

Operating Systems: Linux
