

Yue Xue

Intent: Software Engineer

yue191617@gmail.com

470-651-7713

EDUCATION

Since 08/2023	Georgia Institute of Technology	Atlanta, GA
Expect to graduate 05/2026	Bachelor of Science in Computer Science	GPA: 4.0/4.0
08/2022 - 05/2023	University of Wisconsin-Madison	Madison, WI
	Bachelor of Science in Computer Science	GPA: 4.0/4.0

Relevant Courses

Data Structures and Algorithms, Computer Organization, Database Systems, Machine Learning and Deep Learning, Operating Systems, Computer Networks

SKILLS

- Languages: C, C++, Java, Python
- Backend: Spring Boot, REST APIs
- Database: MySQL, MongoDB, Redis
- Web & Frameworks: Javascript, Typescript, React, React Native, Node.js, Express
- Tools: Git, Docker, Bash, Make, CMake
- OS: Linux

Projects

- Developed an interpreter for Lox, a static typed, garbage-collected programming language with support for object-oriented and functional programming paradigms. Implemented a minimal standard library and achieved performance comparable to Lua, Ruby, and Python.
- Developed a personal mobile application using React Native with Expo that generates flashcards from Excel files. The app allows users to upload spreadsheets, dynamically select columns for the front and back of each flashcard, and study the generated content interactively. Unfamiliar items can be saved to a local SQLite database for future review, enabling personalized spaced practice.
- Developed an web chatroom application in React and Nodejs. It allows users to join and create different channels, sending public and private messages. User profile and uploaded images are stored in MySql and Firebase.
- Wrote a note-taking shell script which integrates with the popular CLI program tldr, offering a powerful tool to access, maintain, and update personal notes efficiently on all kinds of commands, making the use of various command line tool much friendly.

Internship

- | | |
|-------------------|---|
| 05/2025 - 08/2025 | <ul style="list-style-type: none">• Software Engineering Intern at Shanghai 7Road• Contributed to the development of internal microservices SDK using Spring Boot and a Maven multi-module structure. Implemented features across user management, payment processing, logging, and scheduling services. |
|-------------------|---|

Leadership and Activities

- | | |
|---------------|---|
| Since 01/2024 | <ul style="list-style-type: none">• Member of GT WebDev• Led and contributed to the development of BuzzLink, an online video conferencing application. Focused on implementing WebRTC-based real-time communication and developing backend services. |
